Experiment No : 8

Title: Write a program in C++ to Read and Display the information of Employees Using Multiple Inheritance. Use Basic Info and Department Info as the base classes of the Employee class.

Name of Student: Shamiksha Chaudhari
Class: SY **Div:** SY1 **PRN No:** B25ET1005 **Batch:** A1

Program:

```
#include <iostream>
using namespace std;
class basic_info
{
protected:
   char name [30];
   int Emp_Id;

public:
    basic_info()
   {
      cout<<"Enter name of the employee: " ;
      cin>>name;
      cout<<"Enter the employee ID: " ;
      cin>>Emp_Id;
   }

};

class dept_info
{
protected:
   char dept_name [15];
   char work_assign[50];

public:
   dept_info()
   {
      cout<<"Enter name of the Department: " ;
      cin>> dept_name;
      cout<<"Enter the work assignment: " ;
```

```
        cin>>work_assign;
    }
};

class employeeinfo: public basic_info, public dept_info
{
public:
    employeeinfo()
    {
        cout << "\nEmployee information entered successfully.\n";
    }
     void Display_info()
    {
        cout << "\nEmployee Basic info is:\n";
        basic_info();
        cout << "\nEmployee dept info is:\n";
        dept_info();
    }
};

int main()
{
    int i,n;
    employeeinfo Emp[50];
    cout<<"Enter no. of Employee :" ;
    cin>> n;

    for (int i = 0; i < n; i++)
    {
        Emp[i].Display_info();
    }

    return 0;
}
```

Output :

Output

```
Enter name of the employee: Ishita
Enter the employee ID: 1
Enter name of the Department: Entc
Enter the work assignment: write

Employee information entered successfully.
Enter name of the employee: Ashwika
Enter the employee ID: 2
Enter name of the Department: It
Enter the work assignment: code
```
